“Women Scientists in Plant Health Management for Sustainable Development Goals”

*-A National Conference of the Women, by the Women, for the Women Scientists-
Assam Agricultural University, Jorhat, Assam (December 22-23, 2023)*

ABOUT AAU, JORHAT

Assam Agricultural University (AAU) was established on 1 April 1969 in Jorhat in the state of Assam, India and is the premier agricultural research and education institute in NE India. The jurisdiction of the university extends to the entire State of Assam with regard to teaching, research and extension education in the field of agriculture and allied sciences. The university's Plant Pathology Department has state of art laboratory facility and is known for its quality research, teaching and biopesticide works. AAU is the only educational centre in the world to offer a Tea Husbandry and Technology, through a comprehensive four-year degree programme.

ABOUT THE SOCIETY

The Indian Phytopathological Society (IPS) is a professional society for promoting the cause of the science of Phytopathology. The Society focuses on the field of Mycology, Plant Pathology, Bacteriology, Virology, giving a platform to the scientists working in the field of plant pathology-related research to share their research achievements. It also keeps members informed about the various activities related to the development of plant pathology.

ABOUT THE CONFERENCE

Global food security has remained a global research agenda in the back drop of land degradation, climate change, biodiversity loss in recent times where plant health care is the most pivotal factor. Plant diseases as well as other biotic and abiotic factors need a thorough revisits for holistic management strategies under the umbrella of one health framework. Scientists across the globe have been working on various aspects to achieve the goals of production sustainability where in women pathologists and women agricultural scientists under different disciplines have been greatly contributing. The conference, an initiative by Indian Phytopathological Society aims at bringing women pathologists and other scientists to give a platform to show case their works, exchange new ideas and also to encourage young minds for new age research and development for sustainable agriculture
